

The diagram shows a hexagonal lattice with cells numbered 1 through 9. A thick black line (110) highlights a path through the lattice. Dashed arrows (140) indicate a sequence of steps along this path, starting from a cell labeled 1 and moving through cells 2, 3, 4, 5, 6, 7, 8, and 9. Other labels include 120, 130, 150, and 160, which point to specific cells or regions within the lattice.
